

Plan # MBI021-08238

House Plan Details

This lovely Georgian adaptation combines the stately look of brick with the charm of siding for a well-balanced design that will look great in any neighborhood. A portico entry opens to a two-story foyer that splits to lead to a living room/dining room defined by columns, or to the family areas. At the rear, a two-story family room provides a prominent hearth that can be enjoyed from the breakfast nook and island kitchen. A bedroom suite/study on this level is great as a guest room. Upstairs, the master suite is a triumph in style and luxury with a separate hearth-warmed sitting room, vaulted bath, and oversized His and Hers walk-in closets. Three additional bedrooms (one with a private bath) and a laundry room complete the plan.
