

Plan # MBI024-09556

House Plan Details

Handsome brick and classical multipane windows give a lived-in look to this modern home---use reclaimed materials for even more vintage appeal. Enter through double doors to a two-story foyer that opens on the right to a study, and on the left to a bright dining room. The two-story family room is ahead, surrounded by decorative columns and lit by tall radius windows that frame the fireplace. A bedroom on this level makes an ideal guest suite or additional home office. Upstairs, a vaulted beamed-ceiling master suite provides a decadent retreat, with a charming radius-window seat, vaulted spa bath, and a room-size walk-in closet. Three additional bedrooms, one with a private bath, complete the plan.

House Plan Features
